

Docket No. AUS920030661US1

ABSTRACT OF THE DISCLOSURE

METHOD AND APPARTUS FOR TESTING A SOFTWARE PROGRAM USING MOCK TRANSLATION INPUT METHOD EDITOR

A method, apparatus, and computer instructions for testing software programs running on a data processing system. Text is translated from the source language to the target language to form translated text in response to a user input, containing the text in a source language. The text is entered through a computer interface in the data processing system. The translated text is inserted into a user interface of the software program to be tested to form inserted, translated text. The software program is written using the target language. A determination is made as to whether the software program functions correctly using the inserted, translated text.
